## OUR HUMBLE BEGINNINGS

When Columbus, Ohio-based **FST Logistics** first opened its doors in 1991, it had 11 committed employees and a business model that solely focused on shipping and transportation efforts. Since then, we have grown exponentially. In 1998, we bought our first warehouse and a new era of business was born. FST now employs an average of 250 staff members at any given time and provides the best transportation services and warehousing capabilities in Central Ohio. With a reputation of unsurpassed customer service and a clear knack for communication, FST Logistics looks to continue its growth by employing the best minds and talents the industry has to offer.

## WHAT WE DO BEST

While we offer an array of various services, our greatest claim to fame is providing multi-temperature controlled transportation and warehousing with an unprecedented, unmatched emphasis on communication and customer service. Simply put, FST Logistics is the best in the business, whether it be moving your product from A to B securely or executing the highest accuracy in inventory control and order processing.
